# Who We Are

A Leading Sustainability  
Consulting Company

Kaynat Advisory is a boutique sustainability and ESG advisory firm supporting businesses with sustainability assessments, carbon emissions reporting, Environmental Product Declarations (EPDs), and practical sustainability strategies.

We work closely with growing organisations to translate sustainability requirements into clear, achievable actions aligned with market and regulatory expectations.

# Our Core Services

Sustainability  
Assessments &  
Ratings - Ecovadis

---

2.  
Carbon Emissions  
Measurement &  
Reporting

---

3.  
EPD & Life Cycle  
Assessment  
Support

---

4.  
Sustainability  
Strategy &  
Reporting

---

# 1. Sustainability Assessments and Rating - Ecovadis

Advisory support across assessments and rating tools, with specialist expertise in EcoVadis.

We support documentation, gap analysis, and score improvement aligned with assessment criteria and client requirements.

Scope includes:

- Gap analysis against assessment criteria
- Policy and documentation development
- Evidence structuring and submission support
- Score improvement planning

## 2. Carbon Emissions Measurement and Reporting

Measurement and reporting of Scope 1, Scope 2, and relevant Scope 3 emissions to support sustainability assessments, external reporting requirements, and internal decision-making.

Scope includes:

- Boundary and scope definition
- Data collection templates
- GHG calculations aligned with the GHG Protocol
- Summary report with key insights

# 3. EPD & LCA Support

End-to-end support for Environmental Product Declarations (EPDs), including data preparation, LCA coordination, and alignment with recognised standards, in collaboration with accredited LCA practitioners where required.

Scope includes:

- Product scoping and system boundaries
- Data collection across materials, energy, and transport
- Coordination with LCA/EPD programme operators
- Review and submission support

# 4. Sustainability Strategy & Reporting

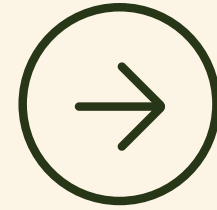

Practical sustainability strategies and reporting support aligned with business priorities, stakeholder expectations, and applicable frameworks.

Scope includes:

- Sustainability roadmaps and action plans
- ESG foundations and internal policies
- Sustainability or ESG reporting support
- Alignment with client, investor, or regulatory requirements

# Our Approach

## How We Work

### Assess and Plan

We review your current practices, data, and requirements to identify gaps and priorities, and define a clear, practical plan aligned with your business and stakeholder expectations.

### Implement

We support the development of policies, documentation, calculations, and processes needed to meet assessment, reporting, or certification requirements.

### Report and Improve

We prepare clear, credible outputs — including assessment submissions, carbon emissions reports, EPD documentation, or sustainability reports — aligned with recognised frameworks and standards.

# Why Kaynat Advisory

Your Trusted Sustainability Partner

## Why work with us

- Practical, implementation-focused support
- Experience with sustainability assessments and reporting
- Clear communication with technical and non-technical teams
- Right-sized solutions for growing businesses
